Great praise is evidently due to the Captain, officers and crew for their steady discipline, self-possession, and care for the lives intrusted to them. The Captain appears to have taken every precaution in his power to insure the safety of his ship, and therefore all the responsibility rests upon the master of the other steamer, which ran into the City of Brussels. It is noteworthy that the escape of any of the crew and passengers of the latter is attributable mainly to the construction of the ship in compartments. Since its passage indeed there has been almost a reaction in some parts of the community in regard to the question. A great many of our farmers and fruit-growers roundly declare that they cannot get on at all without Chinese labor. Some of the fruit-growers positively assert that they would have to abandon their business if they were made dependent on white labor. BOOTS and SHOES

We are constantly seeking to make our BOOTS AND SHOES ideal creations in their respective spheres. Where strength is an object, everything that can tend to that end is eagerly sought for. Where it is shape or style that is paramount, we get our goods manufacturered by those whose taste and skill in such matters is unquestionably great, and so on through the whole category of good points. Thus dealing with manufacturers who are specialists, and being able to do a large business with them, we get not only their best work, but important concessions in price, which enables us to sell our goods for the smallest prices consistent with good work. We keep all sizes, and so fit perfectly, which greatly adds to the comfort and durability of our Shoes.
